Center for Drug and Health Studies
University of Delaware
Newark, DE 19716-2582
(Address all inquiries to Steven S. Martin, martin@udel.edu)

This study was supported by Delaware Health and Social Services, Division of Substance Abuse and Mental Health, through the Substance Abuse Prevention and Treatment Block Grant from the Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services. The study also received substantial and critical support from the Delaware Legislature through the Delaware Health Fund. We wish to thank the members of the Delaware Health Fund Advisory Committee for their assistance. We also want to thank the Delaware Department of Education for their help in conducting the study. The cooperation of all of the participating schools, teachers, and students is greatly appreciated and gratefully acknowledged.

DELAWARE SCHOOL SURVEYS OVERVIEW

The purpose of the Delaware School Survey:

- Providing estimates of students' use/abuse of alcohol, tobacco and other drugs -- the incidence and prevalence of use as well as patterns of consumption, corollary behaviors and attitudes and consequences;
- Providing ongoing trend data- for purposes of reporting to state and federal agencies, schools and school districts and local organizations for assessment, planning, and funding purposes.

The History of the Delaware School Survey:

From 1989 through 1994, the Delaware School Survey was conducted for the Delaware Department of Education with the Perspectives, Attitudes and Use Survey (PAUS). From 1995 to 1998, the Delaware School Survey of Alcohol, Tobacco and Other Drug Abuse was supported by the Delaware Prevention Coalition (administered through the Office of Prevention in the Department of Services for Children, Youth and Their Families) and conducted by the Center for Drug and Health Studies at the University of Delaware. From 1999 to 2003, the survey was a part of the Delaware State Incentive Grant (SIG) Cooperative Agreement from the Substance Abuse and Mental Health Services Administration's Center for Substance Abuse Prevention (CSAP), administered by Delaware Health and Social Services, Division of Substance Abuse and Mental Health. Since 2004, the Delaware School Survey has been jointly sponsored by the Delaware Legislature through the Delaware Health Fund and by support from the Division of Substance Abuse and Mental Health through federal Prevention Block Grant funding. Since 1999 the survey has been expanded from the sample used in previous years to an attempt to interview most 5th, 8th, and 11th graders in the Delaware public schools.

The Current Survey:

The survey is conducted from January into June each year as an anonymous classroom administration, using a form that can be completed in no more than one class period, administered by University of Delaware personnel, rather than by teachers, to help increase students' perceptions that the results were not seen by school personnel. Parents are informed about the survey and given the opportunity to decide if their child should or should not participate. Students also get to choose whether they participate or not. Only a very small number of parents or students choose not to participate. All consent and administration procedures, as well as the survey questions, are reviewed annually and approved by the University of Delaware's Institutional Review Board. The number of completed interviews, excluding any students who reported using a fictitious drug (included as a question) or who otherwise obviously falsified their answers, are reported in the following table.

SAMPLE DESCRIPTION -- DELAWARE SCHOOL SURVEY

	FIFTH GRADE (N= 5243)	EIGHTH GRADE (N= 4678)	ELEVENTH GRADE (N= 3909)
GENDER (%)			
Males	50	50	50
Females	50	50	50
ETHNICITY (%)			
White Non-Hispanic	33	45	44
Black Non-Hispanic	26	24	29
Hispanic/Latino	24	25	21
Other	17	7	6
COUNTY (Ns)			
New Castle	3561	3134	2415
Kent	526	751	900
Sussex	1132	770	594

The survey included the Census version of race/ethnicity. In this format, race, and whether students consider themselves Hispanic are asked in two separate questions. Some students who would have previously identified themselves as white, African-American or "other" are now identified as Hispanic.

Surveys were completed in 18 of the 19 school districts (with the exception of Caesar Rodney School District) in the State as well as 24 Charter Schools. Each of our samples since 1999 allows for statewide and countywide estimates that have much greater reliability and smaller confidence intervals than were available in previous years.

The cooperation and assistance of the schools and school district offices has been essential to completing the survey, and we are very grateful for their help. This year, public schools in the State (with the exception of the Caesar Rodney School District, 2 high schools and 13 middle and elementary schools) agreed to participate. The results have proved useful and important for the state agencies involved, for legislative initiatives, and for the communities statewide who are dealing with the problems of alcohol, tobacco, and other drug use among youth. The expanded samples from 1999 to present have proven even more useful in providing community-level data to schools, state agencies, and communities statewide dealing with the problems of alcohol, tobacco, and other drug use among youth. Data from this year's survey are being used for Federal reporting requirements to the Office of National Drug Control Policy, the Department of Health and Human Services, the Department of Education, and the CDC. Results from the surveys are also a regular part of the Kids Count Reports in Delaware. The findings are being used by schools and by School Districts in their applications for competitive state and federal grants. Information is used to measure prevention program effectiveness in schools and communities. The ongoing collaboration of schools, state agencies, the Delaware legislature and the University of Delaware enables us to provide this service to the State of Delaware.

I. Trends in Past Month or Regular Drug Use in Delaware, 1989-2018

Cigarette, Alcohol, and Marijuana Use Among 5th, 8th, 11th Graders

Inhalant, Hallucinogen, Stimulant, Cocaine, Heroin, Ecstasy, and Prescription Drug Use Among 8th Graders

Inhalant, Hallucinogen, Stimulant, Cocaine, Heroin, Ecstasy, and Prescription Drug Use Among 11th Graders

Average Age of Onset for Tobacco, Alcohol, and Marijuana for 8th and 11th Graders

Perceived Risk of Using Tobacco, Alcohol, and Marijuana for 8th and 11th Graders

TRENDS IN DELAWARE STUDENTS' CIGARETTE USE BY GRADE SELF-REPORTED REGULAR USE, 1989 - 2018

Notes:

Regular use is defined as reports of one cigarette once a month or more often; see footnote page.

Displayed percentiles are rounded to the nearest whole number.

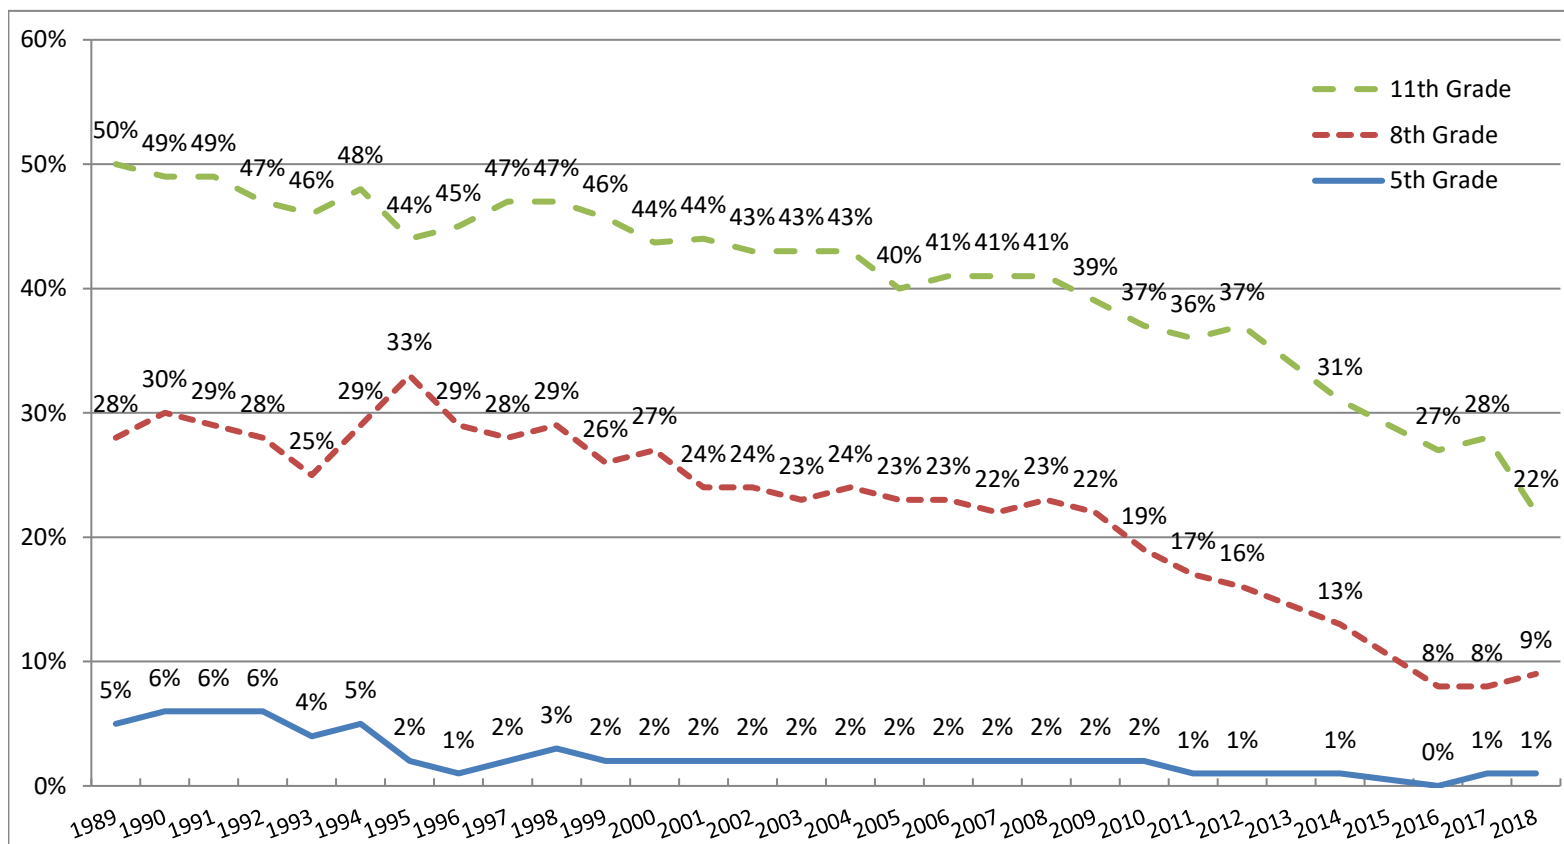

These statistics contribute to the National Outcome Measures (NOMs)

Sources:

Data Base/DiagnosticsPlus (1989-1993); Department of Public Instruction (1994)

Sources:

Data Base/DiagnosticsPlus (1989-1993); Department of Public Instruction (1994)

Delaware School Survey, Center for Drug and Health Studies, University of Delaware (1995-2018).

Important Footnote to the Trend Graphs and Tables of Delaware Students' Report of Monthly or Regular Use:

⇒ The data from the 1989 - 1994 PAUS Survey, administered for the Delaware Department of Public Instruction (DPI), come from responses to the questions: How often do you usually use (or have ever used) each of:

Cigarettes

Alcohol (beer, wine, liquor, coolers)

Marijuana (grass, pot, hash, weed)

With response categories: "never," "once or twice before but not again," "about once or twice a year," "about once or twice a month," "about once or twice a week," and "almost every day." Responses of (about once or twice a month) or more often are considered monthly or regular use.

▷ The data from the 1995 - 2018 year University of Delaware Surveys for 5th graders come from responses to a question similar to that used in the PAUS survey. The data for 8th and 11th graders are different. They come from the questions used in the national Monitoring the Future Surveys (MTF):

In the past month,

how many cigarettes have you smoked

how many times have you had a drink (not just a few sips) of alcohol
(beer, wine, liquor, mixed drinks)

how many times have you smoked marijuana (grass, pot, hash, weed)

⇒ Responses of one full cigarette and one time or more are coded as regular use.

In both the PAUS and UD surveys, any student who reports use of a fictitious drug ("dactyls") is excluded from the analysis.

Nationally, use of marijuana by youth escalated dramatically between 1993 and 1995. It increased even more dramatically in Delaware; however, the change in wording after 1995 may explain part of the increase in drug use shown in the figures from 1994 to 1995. This is particularly true for the 8th graders, if one assumes that past month use may be experimental and not indicative of what one "usually uses." This means the 1995-2016 year question may be measuring past month use rather than past month regular use. And the Delaware estimates for 1989-1994 may actually underestimate past month use, as measured in the national MTF and National Household surveys. The question format has been consistent since 1995.

TRENDS IN DELAWARE STUDENTS' AVERAGE AGE FIRST USE Age First Used Tobacco*

Notes:

* Among those who have ever smoked

Due to an inconsistency on the survey, the 2002 11th grade values are underestimated.

These statistics contribute to the National Outcome Measures (NOMs)

Sources:

Delaware School Survey, Center for Drug and Health Studies, University of Delaware (1995-2018).

TRENDS IN DELAWARE STUDENTS' AVERAGE AGE FIRST USE Age First Used Alcohol*

Notes:

* Among those who have ever drank

Due to an inconsistency on the survey, the 2002 11th grade values are underestimated.

These statistics contribute to the National Outcome Measures (NOMs)

Sources:

Delaware School Survey, Center for Drug and Health Studies, University of Delaware (1995-2018).

TRENDS IN DELAWARE STUDENTS' AVERAGE AGE FIRST USE Age First Used Marijuana*

Notes:

* Among those who have ever smoked marijuana

Due to an inconsistency on the survey, the 2002 11th grade values are underestimated.
